

## Court Reporting

### Court Recorder 9 Software

Depositions  
Courts  
Hearings  
Meetings

- Professional Digital Reporter Software
- Use With Any Windows 10 Computer
- Clear Digital Sound with Optional Digital Video
- Fast, Stress-Free Readbacks
- Multichannel Recording with Automatic Backup
- Take Notes for Improved Transcripts
- Easy to Use and Easy to Learn

Court Recorder 9 software provides the advanced features required for professional digital court reporting. Capture accurate details, easily perform readbacks, and transcribe faster.

Court Recorder 9 replaces handheld recorders with computer-based recording, making it the best digital recorder for court reporters.

Free introductory training webinar, introductory remote software installation, and training videos. First year of Annual Software Support is included for ongoing technical support and software updates.

### Tablet Recorder 9 System

- Thin and Light Windows 10 Tablet Computer
- Digital Recording at the Touch of a Button
- Clear, Digital Sound and Fast Readbacks
- Multichannel and Video Ready

The Tablet Recorder 9 system is ideal for court reporting. Court Recorder 9 software is pre-installed on the sophisticated Microsoft Surface Pro tablet computer. Turn on the tablet, plug in the microphone kit, and start court reporting.

# Court Reporting Kits

SoniClear software can be purchased with a kit of additional equipment needed for court reporting. Following are some examples of products that are available. The kits are tailored to the specific requirements of the reporting work and personal preferences.

## Multichannel Microphones

### **Audio Technica Pro44 Mic**

The Pro44 picks up 180° in front of the microphone. Provides good separation between the parties while having wide coverage on one side.

### **Shure Centraverse Omni Mic**

The Shure Centraverse microphone has an omnidirectional pickup pattern. Useful as a fill microphone at larger conference tables.

### **Samson C02 Hypercardiod Mic**

The C02 microphone has high-quality pickup while keeping the microphone above the table to reduce pickup of paper shuffling noise.

### **Astatic 930VPL Conference Mic**

The 930VPL microphone has a continuously-variable pickup pattern. The built-in push-to-mute switch allows the microphone to be turned off while conferring.

## Microphone Mixers

### **Evo 4 USB Mixer Interface**

The Evo 4 USB mixer includes a 2-channel microphone preamp and loopback mixer for remote reporting.

### **Roland USB Mixer Interface**

The Roland Octa-Capture is a portable USB mixer interface with 8 microphone inputs, for in-person, online, and hybrid reporting.

## Other Microphones

### **SC10 USB Microphone**

The SC10 microphone kit is an entry-level option for recording in smaller conference rooms.

### **Voice Tracker 3 Microphone**

The Voice Tracker 3 microphone kit covers a large area. Useful as a fill microphone in large courtrooms.

## Video Recording Kits

### **Video Encoder Kit**

The Video Encoder Kit captures digital video from a professional videography camera. Video synchronizes with the multichannel audio tracks and notes.

### **Video Camera Kit**

The Video Camera Kit captures digital video using an easy-to-use video camera. Create deposition video without the need for a videographer.

## Accessories

### **SoniClear Cloud Transcription**

Court Recorder 9 can be used with the SoniClear Cloud transcription service to create "rough ASCII" draft transcripts of depositions, court sessions, and government meetings.

### **SoniClear USB Foot Pedal**

The SoniClear USB Foot Pedal works with SoniClear software to simulate a traditional cassette transcriber foot pedal.
