Cloud transcription processing, charged by the hour

Manual transcription using optional USB foot pedal

Works with SoniClear and handheld recorder files

Export computer-generated transcript to Word

Transcript displayed in sync with playback for proofing

Full text of recording improves meeting searchability

Transcription For Government Meetings

Gov Transcriber 9 software helps clerks and administrators produce verbatim transcripts of meetings with less effort. Works with recordings from SoniClear software and handheld recorders.

Compatible with SoniClear

Transcribe using recordings from any SoniClear software product. Notes taken in SoniClear will be visible along with the generated transcript, for proofing and reviewing recordings.

Advanced Voice-To-Text Technology

Gov Transcriber 9 uses the latest cloud-based voice recognition technology to turn meeting recordings into draft transcripts. The artificial intelligence is able to handle people taking turns speaking at a meeting without special voice training.

Handheld Recorders Supported

Gov Transcriber 9 supports most digital recorders. MP3 and WAV files can be imported into Gov Transcriber 9 for transcription and playback.

- Cloud-Based Transcription
- No Voice Training Required
- MP3 or Wav Recording Files

Automatic Voice to Text

Using the SoniClear Cloud transcription service, recordings are converted to a draft transcript. Export to Microsoft Word for final corrections.

Playback and Review

Recordings play in sync with the transcript, for fast proofing. Optional USB foot pedal for handsfree playback control.
