SONICLEAR®
Digital Recording Made Easy

Transcriber 10

Windows Software with Cloud Transcripiton

Automatic Voice-to-Text Conversion

AI-Generated Meeting Minutes and Summaries

Cloud transcription processing, charged by the minute

Manual transcription with Foot Pedal Support

Works with SoniClear and handheld recorder files

Export computer-generated transcript to Word

Transcript displayed in sync with playback for proofing

For Meetings, Courts, Hearings, Depositions

Transcriber 10 software helps clerks, administrators, and court reporters produce meetings minutes and verbatim transcripts with less effort. Works with recordings from SoniClear software and handheld recorders.

Advanced Voice-To-Text Technology

Transcriber 10 uses the latest cloud-based voice recognition technology to turn meeting recordings into draft transcripts. The artificial intelligence is able to handle people taking turns speaking without special voice training.

- Cloud-Based Transcription
- No Voice Training Required
- MP3 or Wav Recording Files

Compatible with SoniClear

Transcribe using recordings from any SoniClear software product. Notes taken in SoniClear will be visible along with the generated transcript, for proofing and reviewing recordings.

Handheld Recorders Supported

Supports most digital recorders. MP3 and WAV files can be imported into Transcriber 9 for transcription and playback.

Automatic Voice to Text

Using the SoniClear Cloud transcription service, recordings are converted to a draft transcript. Export to Microsoft Word for final corrections.

Playback and Review

Recordings play in sync with the transcript, for fast proofing. Optional USB foot pedal for handsfree playback control.

Automated Transcription for MP3 and WAV recordings created with SoniClear or Recorder
